

## One Day One Record

### (H)excellent Hedgehogs

Sunday 18<sup>th</sup> July 2004

We need your records of Hedgehogs!  
– have a look in your garden, nearby park, or local countryside and make a record of a Hedgehog if you see one, and then send the record to BRERC.

As Britain's only spiny mammal they're easy to identify but they spend most of the day sleeping so not so easy to find. Their favourite food is slugs and snails so they are great pest controllers. If you use slug pellets in your garden you could also be poisoning Hedgehogs.

Hedgehogs can be found almost anywhere, including woodlands, hedgerows, scrub and cultivated land. Most people will come across them rooting around their gardens whether in the countryside or the city.

**If you see a Hedgehog, please use the recording form overleaf, then return it to BRERC. Thank you.**

You can also send in records using our website.
